

We understand that nothing grows forever. Companies need to innovate to ensure persistent growth or face long-term diminishing returns. We develop high-tech solutions, tailored to the needs of the companies of the future.

We participate in the digitalization of the industry to version 4.0.

We will help create your next game changer  
- At Move we call it a Golden Egg

We will help create your next game changer  
We call it a Golden Egg

Innovation leads to sustainable growth

move innovation  
get your ideas moving

- a mechatronic company that develops, tests and produces electronic devices

[www.moveinnovation.dk](http://www.moveinnovation.dk)

We are a high tech company creating electronic devices and solutions for our customers.

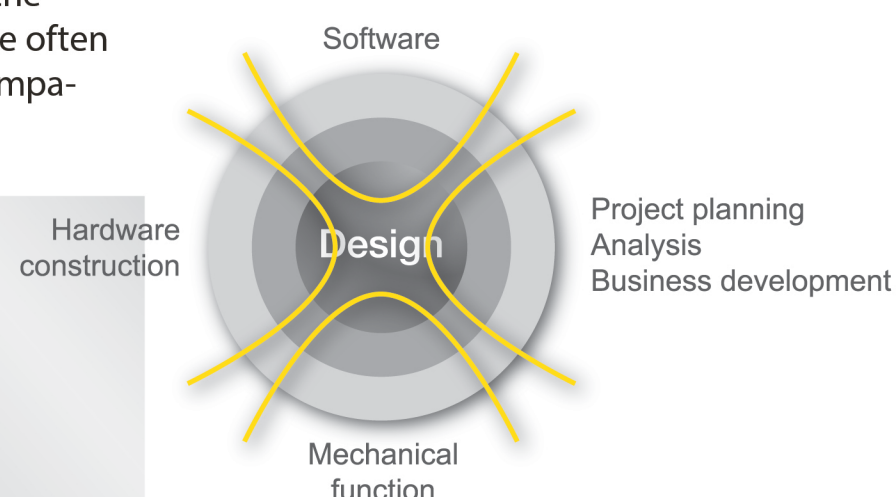

We take responsibility and lead our customers throughout the innovation process.

Reaching the goals fast and efficient.

- Model based development and mathematical modelling
- IoT solutions and industrial IoT solutions
- Sensor solutions
- Databases and infrastructure
- Embedded software
- Telemedicine solutions
- Medical Devices
- Hardware Design
- Housing
- Apps
- CE certifications

Examples of standards used

- ISO 9001
- EN 62304 (Software Lifecycle Processes)
- EN 13485 (Medical Devices)
- EN 60601 (Product)
- EN 14971 (Risk, proces)

Funded projects and research projects  
Move Innovation participates in several projects funded by investors, the EU and the Danish Government. These projects are often completed in cooperation with big companies and universities.

## Four Cases

1

- We did:
- Telemedicine Solution
  - Userdriven development
  - Design for manufacturing
  - ISO 13485, Clla certified
  - Embedded SW and Math
  - Mechanics and Hardware
  - IoT
  - App

**spiromagic**  
monitoring your lungs

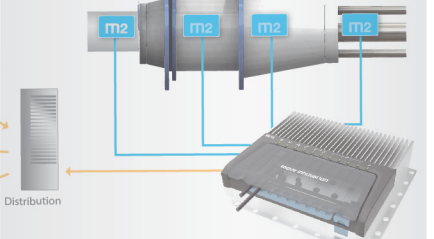

Spiromagic  
Smartphone based spirometer.  
Medical device measuring lung functions in seconds

Move CMS  
Predictive Health Management  
Condition Monitoring Systems  
FPGA Solutions

2

- We did:
- Modelbased development
  - Embedded SW
  - Manufacturing
  - Mechanics
  - Hardware
  - Math
  - IIoT
  - IP67 standards

**m**

3

MiWire  
High Speed Internet Everywhere.  
MiWire introduces game changing Internet Solution

**miWire**

- We did:
- Agile development
  - Project office based on people from the customer and from Move Innovation
  - Embedded SW
  - Hardware

4

**Mouldflo**

Mouldflo  
Systems for injection moulding machines.  
Mouldflo offers an affordable manifold solution for monitoring flow and temperature of cooling circuits within a mould.

- We did:
- Agile development
  - Embedded SW
  - Manufacturing
  - Mechanics
  - Hardware
  - Math
  - IIoT
