

## AT A GLANCE

- 31 different modules
- Transmission of signals, power, high current, coax, compressed air, fluid, high-speed and fiber optics in one interface
- PCB connection modules as alternative connection option
- Very simple and tool-free assembly and disassembly of the modules in a robust metal frame
- 54 housing options: metal or plastic housing
- 4 types of locking: spindle, lever locking, transverse locking or push-pull locking
- Crimp-clip contacts incredibly easy to remove from the mounted module, even when assembled
- Space-saving: very high packing density
- Two-shell ODU-MAC<sup>®</sup> RAPID housing for **up to 50 % time saving during assembly**
- 10,000 mating cycles and more with consistently low contact resistance
- All from one source: available from quantity 1 including cable assembly

## OUR MODULE HIGHLIGHTS

- 20 contacts signal module: space-saving, pin protection, reliable 0.7 mm contact with up to 11 A
- 2 contacts fluid module: 10 bar, two-sided shut-off solution, M5
- Combination module high-speed & coax: data rates up to 5 Gbit/s, coax for 50 or 75 Ohm
- 2 contacts high voltage module: 5,800 V
